

CONTRACT AGREEMENT

RELIEF SUPPLIES

With the water situation addressed, attention has turned to food. The need across the region hasn't gone away. If anything, it's grown.

Your PMC is contracted to collect and deliver food supplies to the Relief & Supply Center. This is the second phase of an ongoing relief effort.

SUCCESS CRITERIA

\$50,000

Relief supplies are successfully delivered.

FAILURE CONDITIONS

-\$20,000

Failure to deliver relief supplies before endex.

T.E.W.S. READINESS AUDIT

A mandatory civil emergency preparedness review has been issued following a series of severe weather events. The T.E.W.S. (Tornado Early Warning System) has fallen into significant disrepair. Several stations haven't been tested in years, and local maintenance records are either lost or fabricated.

Your PMC is contracted to conduct a live Operational Readiness Audit. Navigate to each designated siren station and manually trigger the test cycle. Documented confirmation is needed that these units can still alert the public before the next storm season makes the question irrelevant.

SUCCESS CRITERIA **\$150,000**

Successfully navigate to and trigger the TEWS siren test cycle at all designated locations before endex.

FAILURE CONDITIONS **-\$20,000**

Failure to complete the full audit route before Endex.

BAG & TAG

Known terrorist and war criminal Wassily Kandinsky has been spotted in Halizstan. Intelligence places him meeting with a local shopkeeper. Locate and capture Kandinsky alive.

Once captured, secure him and hold his position until you have confirmed contact with us. Further instructions will follow once the contract is signed.

SUCCESS CRITERIA

\$150,000

Capture Kandinsky ALIVE

FAILURE CONDITIONS

-\$50,000

Failure to capture or Kandinsky is killed

INFRASTRUCTURE STABILIZATION INITIATIVE

A region-wide Grid Integrity Audit is underway. Years of neglect and unauthorized bypasses have left the power grid in a state of total mystery. The records don't match the hardware on the streets, and that needs to change. Your PMC is tasked with navigating to the designated building addresses and conducting a physical inventory of the power equipment. Locate and record the serial numbers for the electrical transformer boxes and utility poles at each site. This data is critical for restoring stable power, and for identifying exactly who has been running private server farms off the grid.

SUCCESS CRITERIA**\$75,000**

Relay serial numbers from all five power equipment locations to Halizstan National Power Works, identifying each address sequentially before Endex.

FAILURE CONDITIONS**-\$15,000**

Failure to provide a complete and accurate list of all five equipment sets.

FIELD REPORT

Coverage is expanding. Following the Municipal Office segment, the station has turned its lens toward the private security forces operating in the region, specifically the ones whose conduct has raised a few eyebrows. Your PMC is contracted to capture drone footage of the rival security outfit currently operating in Halizstan. Clear aerial footage of their commander in the field is needed. The network is building a segment on professionalism. Make sure the footage speaks for itself.

SUCCESS CRITERIA**\$25,000**

Clear 1 min of footage of opposing teams commander

FAILURE CONDITIONS**-\$5,000**

Failure to provide copy or acquire video

VOH LIVE: THE STABILIZER'S SIGNAL

Coverage is going to the field. The station wants to sit down with your PMC Command to showcase the professionalism of private military operations in the region. A production team will be on-site with a portable studio setup, including a high-intensity lighting rig running off a field generator.

Your PMC is responsible for holding a hard perimeter for the duration of filming. Local disruptions at high-profile media events are not unheard of. No power means no production, so keep that generator running.

SUCCESS CRITERIA
\$75,000

Ensure PMC Command completes the full VOH interview safely while maintaining continuous power to the studio lighting rig via the provided generator.

FAILURE CONDITIONS
-\$25,000

Neutralization or compromise of PMC Command's safety, loss of studio lighting due to generator failure, or the destruction/unauthorized breach of VOH equipment and the secure perimeter.

RELAY RECOVERY

The entire IT department was let go as part of an administrative modernization initiative. Unfortunately, no one documented how the signal routing infrastructure was configured before escorting them out. The station's patch distribution frame is in an unknown state, and the broadcast cannot reach a global audience.

Your PMC is contracted to restore the signal routing network. Navigate to the VOH broadcast station and get their distribution panel back online. All 10 nodes need to be active and linked before they can get back on air.

SUCCESS CRITERIA**\$85,000**

Restore all 10 broadcast nodes on the VOH distribution panel before Endex.

FAILURE CONDITIONS**-\$20,000**

Failure to bring all 10 broadcast nodes online before Endex.

TUBE TRIAGE

Counterfeit Image Intensifier Tubes have been integrated into regional surveillance systems. These fake units fail unpredictably and compromise optical integrity. An off-book acquisition of several crates from a local third-party supplier has been arranged to pull them out of circulation.

Your PMC is tasked with retrieving the crates and running a field audit. Open the packages, cross-reference the serial numbers against Raytheon production dates, and identify the verified authentic units. Once the audit is complete, repackage and secure the authenticated hardware for extraction.

SUCCESS CRITERIA**\$90,000**

Retrieve the IIT component crates, cross-reference all serial numbers against the production log, and successfully repackage the audited units for extraction before Endex.

FAILURE CONDITIONS**-\$30,000**

Failure to retrieve components before the Startex window closes, or any subsequent loss, theft, damage, or sunlight exposure of the sensitive tubes—including submitting a manifest with mismatched serial numbers—will result in an immediate contract breach

ARTY, PART 1

The Halizstan Municipal Office has ordered a demonstration of our new anti-vehicle weapon, and we don't have the staff to deliver and operate it.

The weapon has been developed and staged at the Raytheon Technologies Regional HQ. Your PMC is required to meet our technicians, where they will train you on operation and maintenance before the demonstration.

Once training is complete, a follow-on contract will be issued to deliver the weapon to the Municipal Office.

SUCCESS CRITERIA **\$70,000**

Successfully meet with the techs, and complete the demonstration course.

FAILURE CONDITIONS **-\$20,000**

Failure to meet with the techs, or complete the demonstration course successfully.

CONTRACT AGREEMENT

ANALOG AIR-GAP

A set of classified technical drawings was sent to a regional facility via physical mail, filed under generic sender names as a standard security precaution. The shipment never arrived.

Records indicate the package stalled at the Halizstan Post & Package Authority, buried in their backlog. The drawings were split across 15 separate envelopes to reduce risk, each marked with a discrete internal reference code. Your PMC is contracted to locate all 15 envelopes, consolidate the contents, and deposit the complete package into Mailbox 497 for secure collection. An incomplete set is worthless to us.

SUCCESS CRITERIA**\$150,000**

Breach the Halizstan Post & Package Authority sorting room, locate and retrieve all 15 engineering drawings from the individual mail envelopes, repackage the complete set into the pre-addressed envelope and deposit it into Mailbox 497 before Endex.

FAILURE CONDITIONS**-\$50,000**

Failure to locate all 15 engineering drawings, an incomplete or missing set deposited into Mailbox 497, or failure to complete the drop before Endex.

AMMUNITION DELIVERY

7.62mm and 5.56mm ammunition needs to reach the drop point. Shipping restrictions prevent sending fully loaded magazines. Rounds and magazines will arrive separately. You'll need to load and pack them before delivery. Crates can be collected from the Norinco Regional Operations Office. Further details will be provided once the contract is signed.

SUCCESS CRITERIA

\$50,000

Successful delivery of the ammo crates, to the outlined location, before endex.

FAILURE CONDITIONS

-\$10,000

Ammo crates are not delivered before endex to drop point

ARM THE MOB

Norinco's supply lines into Halizstan have been severed. Checkpoints are hostile, borders are closed, and conventional delivery isn't an option.

Your PMC is contracted to source raw materials locally and fabricate weapons on the ground. Norinco has provided the specs — keep it simple, keep it cheap. With Federation-loyal citizens actively resisting the separatist government, demand is high and the window is short.

Deliver the finished product to our contact inside Halizstan. Distribution from there is handled. Further details will be provided once the contract is signed.

SUCCESS CRITERIA**\$75,000**

Acquire resource to build, assemble and deliver weapons to our contact within Halizstan.

FAILURE CONDITIONS**-\$10,000**

No weapons delivered before endex.

CONTRACT AGREEMENT

RETURN TO SENDER

The National Mail Service has been re-established. Partly because progress demands it. Partly because the internet is down again. Your PMC has been brought on as official mail couriers.

Ensure that critical correspondence and packages are delivered across the region by whatever means necessary. Further details will be provided once the contract is signed.

SUCCESS CRITERIA**\$50,000**

Deliver letter mail to all assigned mailboxes.

FAILURE CONDITIONS**-\$5,000**

Missed or misdelivered items. Packages lost, stolen, or tampered with.

ROADSIDE ASSISTANCE

There's a priority shipment that needs to reach the Polish Border checkpoint, and the usual route isn't looking great. The postal delivery truck has seen better days. So has the road.

Your PMC is contracted to escort the truck to the final handover point. The cargo is time-sensitive and must arrive intact. Once the tires hit the Poland Road, there's no turning back.

SUCCESS CRITERIA**\$70,000**

Successfully escort the postal delivery truck and its cargo to the final Polish Border checkpoint before Endex.

FAILURE CONDITIONS**-\$20,000**

The postal delivery truck or its cargo is immobilized, abandoned, or destroyed before reaching the destination.

HAZMAT

Hazardous waste materials require disposal at a designated site in central Halizstan. They must arrive intact and must not fall into the wrong hands.

The materials are highly radioactive. Four protective suits will be provided and can be collected along with the waste. The protective casing on the containers holds for approximately 45 minutes. Miss that window and the clean-up bill is yours.

SUCCESS CRITERIA**\$100,000**

Successfully transport and deliver all radioactive waste containers to the designated central Halizstan disposal site before the 45-minute protective casing limit expires and before Endex.

FAILURE CONDITIONS**-\$35,000**

Failure to deliver all waste containers to the disposal site before Endex, loss or destruction of any container, or exceeding the 45-minute exposure window without completing the delivery.

CONTRACT AGREEMENT

CLEAN SWEEP

The Municipality has asked available contractors to clear out the former central palace as part of an effort to repurpose the region's administrative centers.

Years of archived assets and sensitive equipment from the previous administration need to be relocated to secure off-site units immediately. Cleared personnel who won't ask questions are required.

Relocate the old regime's assets to the back of the shelf and make room for progress.

SUCCESS CRITERIA

\$100,000

Successfully transport and secure all fragile archived assets to the designated storage facilities.

FAILURE CONDITIONS

-\$20,000

Failure to deliver all cargo to the storage facilities before Endex.

CONTRACT AGREEMENT

WAR TOURIST

There's a social media influencer in Halizstan with a habit of visiting active conflict zones for content. He wants protection, and he wants to vet the team himself before signing anything. The Nightclub has made the introduction.

Your PMC commander is to present themselves at the Halizstan Nightclub & Lounge for a face-to-face with the client. He'll want to talk details, assess the team, and decide whether your PMC is worth his money. Show up and make the sale.

SUCCESS CRITERIA

\$60,000

PMC commander meets the war tourist at the Halizstan Nightclub & Lounge and discusses protection details.

FAILURE CONDITIONS

-\$10,000

PMC commander fails to attend the meeting.
